Rishabh Kankariya

B.Tech CSE Student @ MIT-ADT University | Aspiring Cloud & DevOps Engineer | AWS Docker Kubernetes Terraform Linux GitHub Actions | Technical Secretary @ Zone Of Engineering Innovators
Ujjain, Madhya Pradesh, India

Summary

Hey, I'm Rishabh Kankariya, a Third-Year B.Tech Computer Science student at MIT-ADT University with a growing interest in Cloud Computing, DevOps, and Infrastructure Automation. Open to internships, collaborative projects, and opportunities to learn from industry professionals.

Experience

Zone Of Engineering Innovators

Technical Secretary

February 2026 - Present (5 months)

Led website management, team task allocation, and data security implementation. Ensured efficient project execution and maintained reliable, secure digital systems for club operations.

IEEE

Student Member, IEEE Student Branch

February 2026 - Present (5 months)

contributing to event execution, cross-team collaboration, and technology-driven initiatives.

CodeAlpha

Cloud Computing Intern

May 2026 - June 2026 (2 months)

India

- Completed a Cloud Computing Internship at CodeAlpha, gaining hands-on experience in cloud deployment, application hosting, and infrastructure management.
- Designed, developed, and deployed a Cloud-Based Bus Pass System featuring digital pass management, secure payment integration, PDF receipt generation, email notifications, and an admin analytics dashboard.

- Built and deployed an AI Chatbot Platform with user authentication, knowledge base management, semantic search capabilities, and cloud-hosted API services.
- Worked with Azure Virtual Machines, Linux servers, Nginx, Cloudflare, SSL certificates, and domain configuration to deploy and manage production-ready applications.
- Implemented containerization, API integration, database management, authentication systems, and cloud networking concepts in real-world projects.

Thinking Machines

Student Trainee

August 2024 - October 2025 (1 year 3 months)

Ujjain, Madhya Pradesh, India

At Thinking Machines E-Learning Center, I focused on building a strong foundation in Core Java and expanded my skills into Advanced Java. My training involved hands-on practice with object-oriented programming, exception handling, file I/O, JDBC, and servlet-based web applications. One of my key takeaways was learning how real-world Java projects are planned, developed, and deployed. I worked on mini-projects that helped me understand application architecture, database connectivity, and modular code development. These experiences gave me valuable insight into backend development and strengthened my ability to write clean, efficient, and scalable Java code.

Throughout the program, I also improved my problem-solving approach and became more confident in applying Java concepts to practical use cases preparing me for project-based environments in future roles.

Allsoft Infotech & Multimedia Pvt. Ltd.

Web Development Intern

November 2024 - January 2025 (3 months)

Ujjain, Madhya Pradesh, India

At Allsoft Infotech & Multimedia Pvt. Ltd., I stepped into the world of front-end development, where I worked on real-time projects involving HTML and CSS. I played an active role in crafting clean, responsive web layouts and refining the user experience to ensure interfaces were smooth, intuitive, and engaging. The internship gave me a solid grounding in web standards and best practices, while also boosting my eye for UI/UX design from layout structures to user flow. It was a deep dive into the practical side of design thinking and front-end development.

Manal Softech Pvt Ltd
Web Development Intern
May 2023 - June 2023 (2 months)
Ujjain, Madhya Pradesh, India

During my internship, I worked on various web development projects, where I was actively involved in designing and building functional websites using HTML, CSS, and JavaScript. My contributions included developing structured layouts, ensuring responsive design across devices, and optimizing the overall user experience. This hands-on experience significantly strengthened my front-end development skills and gave me a deeper understanding of how to translate design concepts into interactive and user-friendly web interfaces.

Programmers Point Software Training Institute
Student Trainee
September 2022 - March 2023 (7 months)
Ujjain, Madhya Pradesh, India

At Programmers Point Software Training Institute, I built a solid foundation in C and C++, progressing from basic syntax to more advanced programming concepts. The training focused on deepening my understanding of core topics such as data types, loops, functions, arrays, pointers, object-oriented programming, and memory management. Through hands-on coding exercises and concept-based learning, I gained the ability to write efficient, structured, and logical code while also developing a clear grasp of how these languages work behind the scenes. This experience played a key role in shaping my programming mindset and strengthening my problem-solving approach.

Education

MIT ADT University
Bachelor of Technology - BTech, Computer Science · (August 2025 - June 2028)

Govt. Ujjain Polytechnic College Ujjain

Diploma, Computer Science · (August 2022 - June 2025)

Govt. Excellence H. S. School, Madhav nagar, Ujjain

10th, Science · (April 2020 - March 2022)
